PRPC: Overview

Overview
The PegaRULES Process Commander (PRPC) Overview is a must for managers, executives, and others in the organization who want to understand how to apply PRPC to their lines of business. Using a combination of presentations, demonstrations, and group discussions this course gives organizational leaders a foundation in PRPC that enables them to lead successful implementations.

Students learn the essential elements of a Business Process Management (BPM) application, how the SmartBPM® Methodology is used to effectively plan, scope and manage Pega projects. In addition, participants learn about PRPC tools such as Direct Capture of Objectives (DCO) application design patterns, connectors and services, and reporting.

Course Benefits
By the end of this course, you will be able to successfully:

- Describe how PRPC can be used to implement a BPM solution
- Describe how the DCO tools can be used to capture business objective and catapult an organization's development cycle
- Understand how Application Design Patterns can be used to implement a PRPC solution
- Understand how Connectors and Services within PRPC can be used to interface with other applications being used at your organization

Target Audience
Business Managers that want to learn how PRPC can be used to implement a BPM solution
