Approaching Deadlines: **Financial & Operational Risks**

The deadlines are enforced—but how you architect your modernization is up to you. You do not have to disrupt critical operations to meet these milestones.

TODAY

Organizations weigh the scope, cost, and timelines of S/4HANA migrations.

2030

Security Risk: Extended support ends completely. Running unsupported systems introduces unacceptable risk.

2027

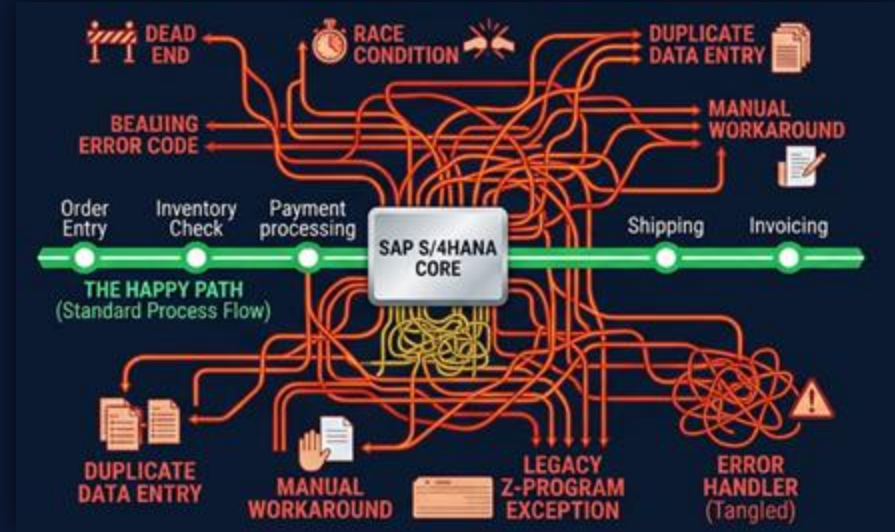

Financial Enforcement: ECC mainstream maintenance ends. Sticking to ECC means rising, premium fees.

Decades of Custom Logic Reside **Outside the "Happy Path"**

SAP standardizes the core seamlessly, but real-world work is full of exceptions.

Organizations have spent decades writing custom ABAP code to handle:

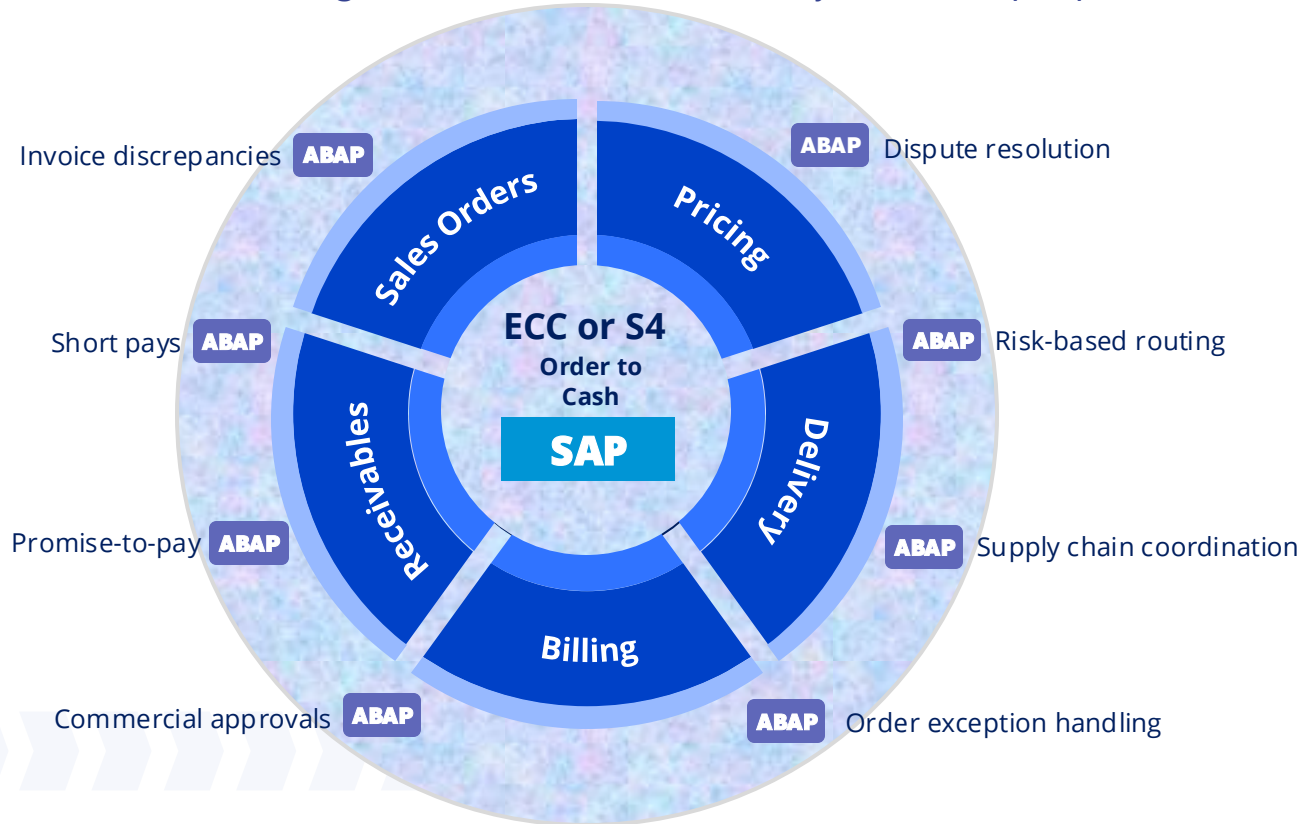

- Cross-organizational approvals (Finance, Sales, Legal)
- Exception-driven routing and reprioritization
- Dispute resolution and short pays
- Complex, multi-system promise-to-pay workflows
- Customer-specific contract deviations

ASUG research shows that heavy reliance on embedded custom code is a primary blocker to SAP S/4HANA migration, driving higher cost, longer timelines, and elevated risk.

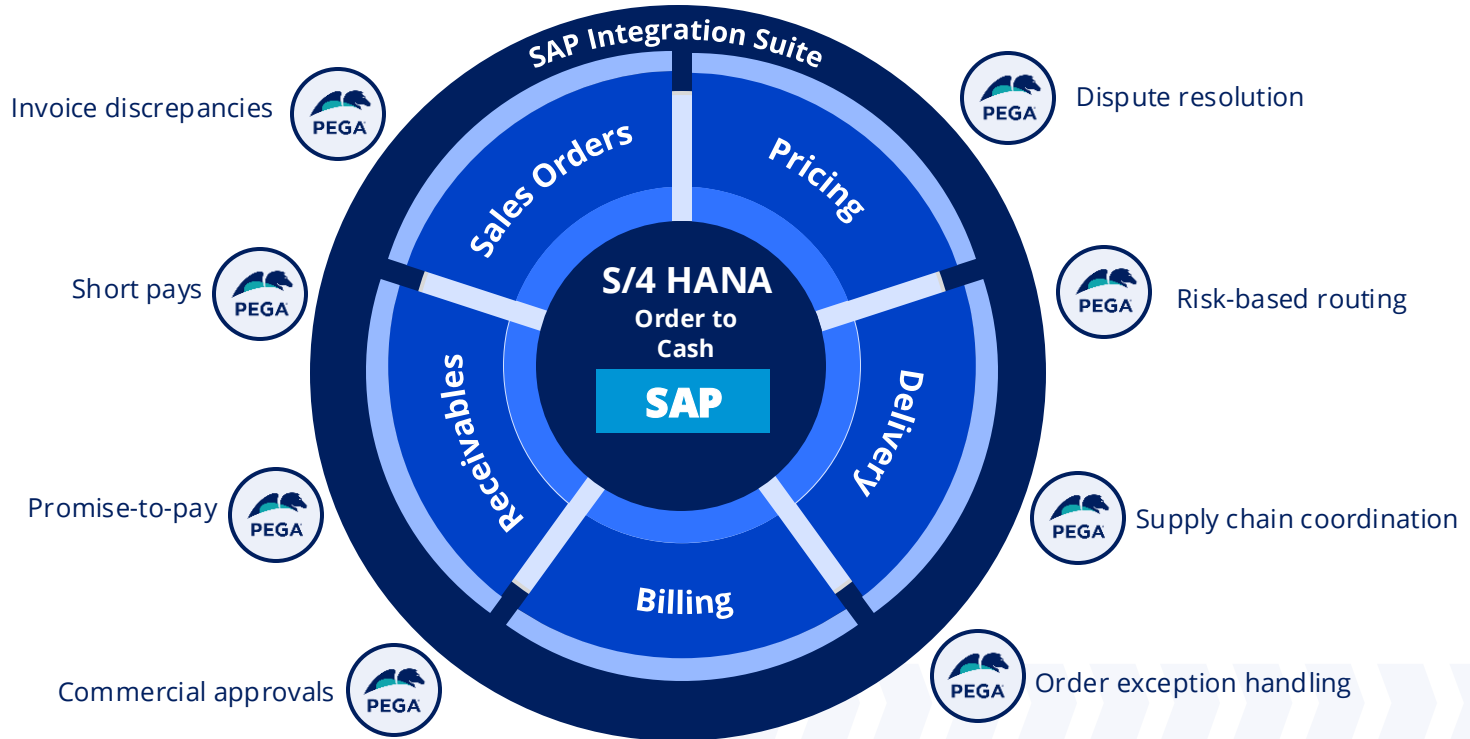

Most organizations have years of customizations

Many of them focused on orchestrating workflows across external systems and people

Pega brings Agentic Automation to those customizations

Transform years of custom workflows before Go-Live or your bi-annual S/4 release

Don't Rebuild. **Extract and Convert with Agentic AI.**

Forget months of manual redesigns and rebuilding in ABAP or BTP.

SAP to Pega Agentic AI redefines how you manage legacy customizations.

1. Scan

AI agents analyze your legacy ECC environment, mapping custom ABAP, transaction usage, and embedded logic.

2. Extract

Pega extracts the critical business rules, personas, and exception paths hidden deep within legacy code.

3. Convert

Business intent is automatically mapped into Pega GenAI Blueprint to generate working case lifecycles in hours.

4. Run

Deploy instantly to Pega Infinity, integrating seamlessly with your SAP backend for immediate execution with agentic orchestration.

Reimagine in
Pega Blueprint

Deploy to Pega Infinity
and SAP S/4HANA

Accelerating Value Across **All S/4HANA Migration Profiles**

AI-driven conversion reduces risk and timeline pressure, regardless of your current SAP phase.

ECC 6.0 (Pre-Migration)

Extract and externalize heavy custom logic *before* your migration to dramatically reduce the scope and risk of your S/4 move.

Mid-Flight

Decouple complex workflows causing project delays in real-time, ensuring you hit your critical go-live deadlines.

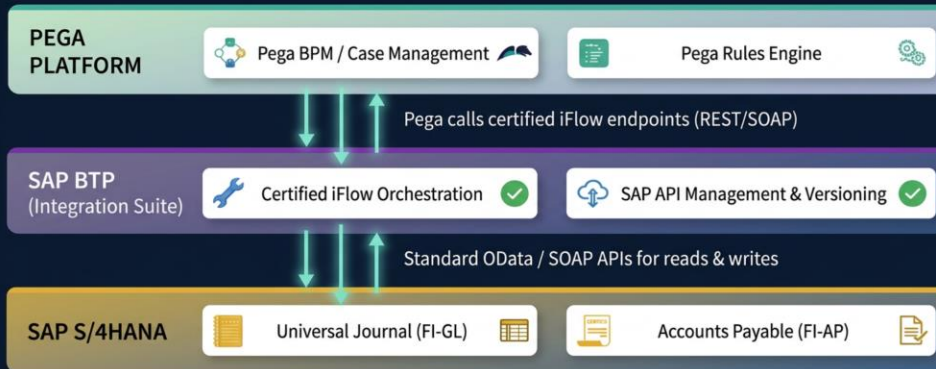

S/4HANA (Post-Migration)

Did you lift-and-shift technical debt? Use Pega to systematically "de-customize" your new environment and gain agility.

Pega + SAP: Orchestrating the Enterprise

Pega is the execution layer that complements SAP as your system of record.

Unified Pega + SAP Integration Architecture

Protect the Core

Pega handles the messy, human-in-the-loop workflows, exceptions, and cross-system routing. A clean SAP core becomes a natural downstream benefit.

Connect to Anything

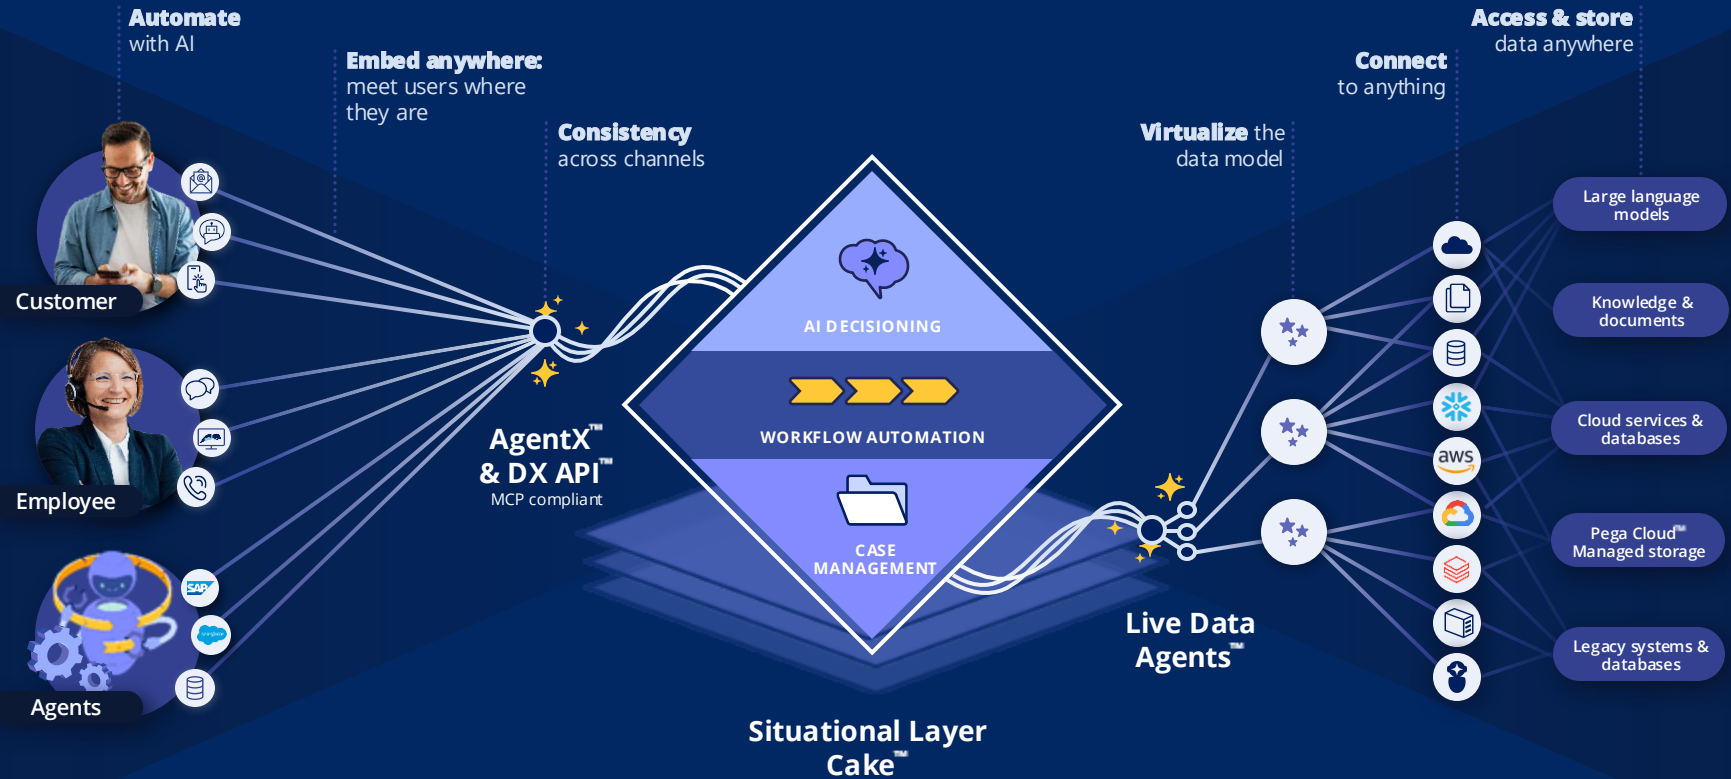

Live Data™ virtualization safely reads and writes to SAP without duplicating data or disrupting the core.

Embed Anywhere

Meet users where they are, deploying SAP-integrated workflows directly into mobile, web, and chat channels.

Center-out Agent Architecture™

Orchestrate AI agents, workflows, and decisions to accelerate enterprise transformation

Save Time. Reduce Cost. **Control Risk.**

Accelerate Time-to-Value

Convert legacy ABAP into working workflows in days using AI, drastically reducing overall transformation timelines and dependency on manual coding.

Reduce Deadline Risk

Hit your 2027/2030 milestones reliably by shrinking the scope of your ERP migration and focusing only on what must move.

Lower Customization Costs

Orchestration lives outside the ERP core, allowing your business workflows to evolve instantly without expensive, slow backend rewrite cycles.

Built-in Governance

Every extracted workflow becomes fully auditable immediately, with compliance and security embedded directly into the flow of work.

Trusted by the World's Leading Brands **Alongside SAP**

Deutsche Telekom

- Uses Pega as a side-by-side orchestration and workflow platform around their SAP environment.
- Keeps SAP as the single source of truth while externalizing workflows, business logic, and cross-system orchestration in Pega, enabling standardization, governance, and continuous change without compromising the SAP clean core.

Unilever

- Positions Pega as the system of work orchestrating workflows, decisions, and exception handling across SAP-driven operations.
- Coordinates cross-functional processes such as order-to-cash and master data while externalizing logic from SAP, enabling agility, visibility, and continuous change without disrupting the clean core.

Start Your **AI Analysis** Today

Don't let legacy customizations dictate your modernization timeline.

- ✓ Scan your SAP system today.
- ✓ See what can be extracted and converted into a working Blueprint this week.
- ✓ Reduce your deadline risk without reopening your migration scope.
