CVS Health

Alpeshkumar Tailor

Executive Director of Data Engineering
CVS Health

Chris Davies

Vice President, Decisioning
Blend

Prioritize programs based on **addressable value, business alignment and member needs**

How can we help? What behaviors should change?

What is the barrier preventing behavior change?

AI-driven identification of barriers, and customer archetypes

1

2

3

Our approach

Where and when should we present the action?

Which “actions” are most likely to work?

Agile, cross-functional pods:
Design content and engagement strategy

Automation software:
Omni-channel outreach, multivariate testing (e.g., efficacy of tactics, channels, etc.)

RAPID AND CONTINUOUS TEST AND LEARN

How Pega Enables Transformation

Key Learnings and Challenges

Change Management

Sell the long-term vision

Data Model

Data model is key

Implementation Strategy

Must be strategic about how to begin using new technology

Long Term Goals

Innovative thinking for the future

**Activate
Inbound**

**Greater
Automation**

Scale

Other types of
messages and teams
