

The Value of Patient Navigation at HCA Healthcare

June 2023

Presenters

Barbara Coughlin
VP, Care Navigation Operations

Meredith Schiefer
*Director,
Care Navigation Operations*

Sonya Sharkey
*Director,
Care Navigation Operations*

Jesse Jawanda
Sr. Director Care Management ITG

Objectives

- HCA healthcare
 - Overview
 - Care navigation
- Enterprise care navigation solution
 - Building an agnostic layer: acceleration and configurability
 - Leveraging Pega to drive workflow
- Review of outcomes

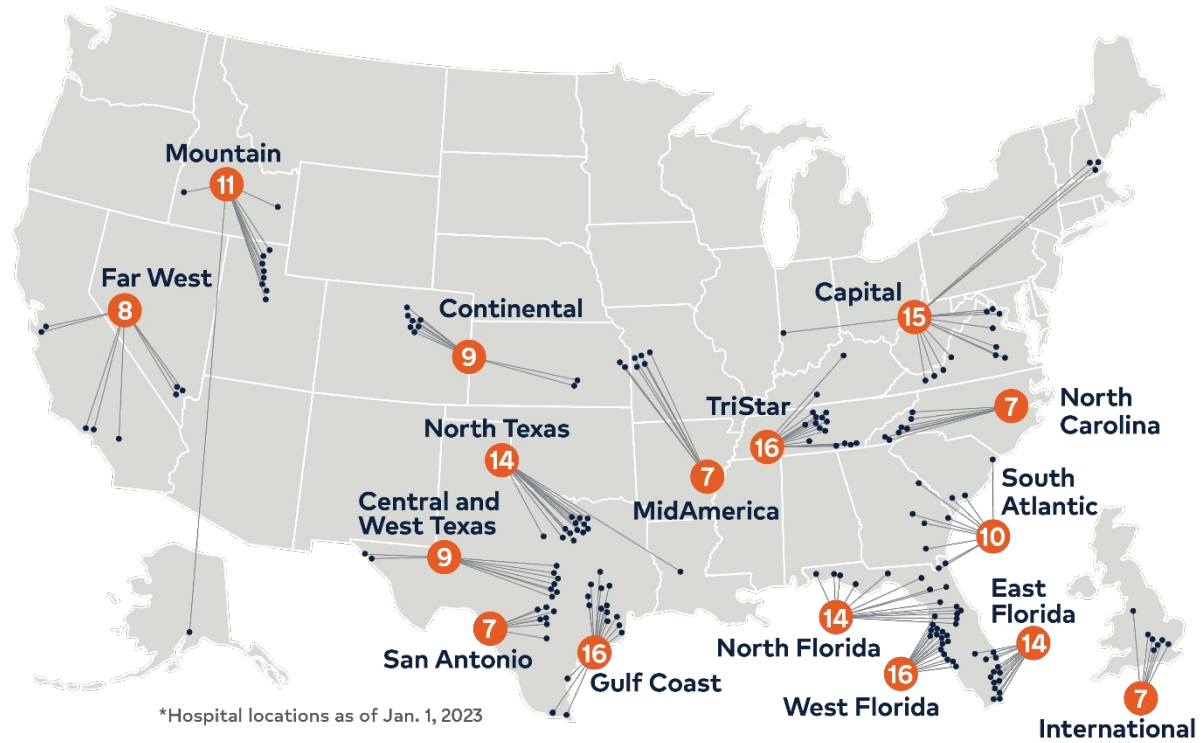

Our Mission

*Above all else,
we are committed
to the care and
improvement of
human life*

Our Enterprise

HCA Healthcare is one of the nation's leading providers of healthcare services, comprised of approximately **2,300** ambulatory sites of care, including **180*** hospitals, in **20** states and the United Kingdom

By the numbers

~294K

colleagues

93K+

registered nurses

Ranked 62

in Fortune 500**

45K+

active and affiliated physicians

37M+

patient encounters

9M

emergency room visits

218K

babies delivered

All information is as of Dec. 31, 2022, unless otherwise stated.

*As of Jan. 1, 2023

**As of May 2022

Other sites of care:

Ambulatory Surgery Division

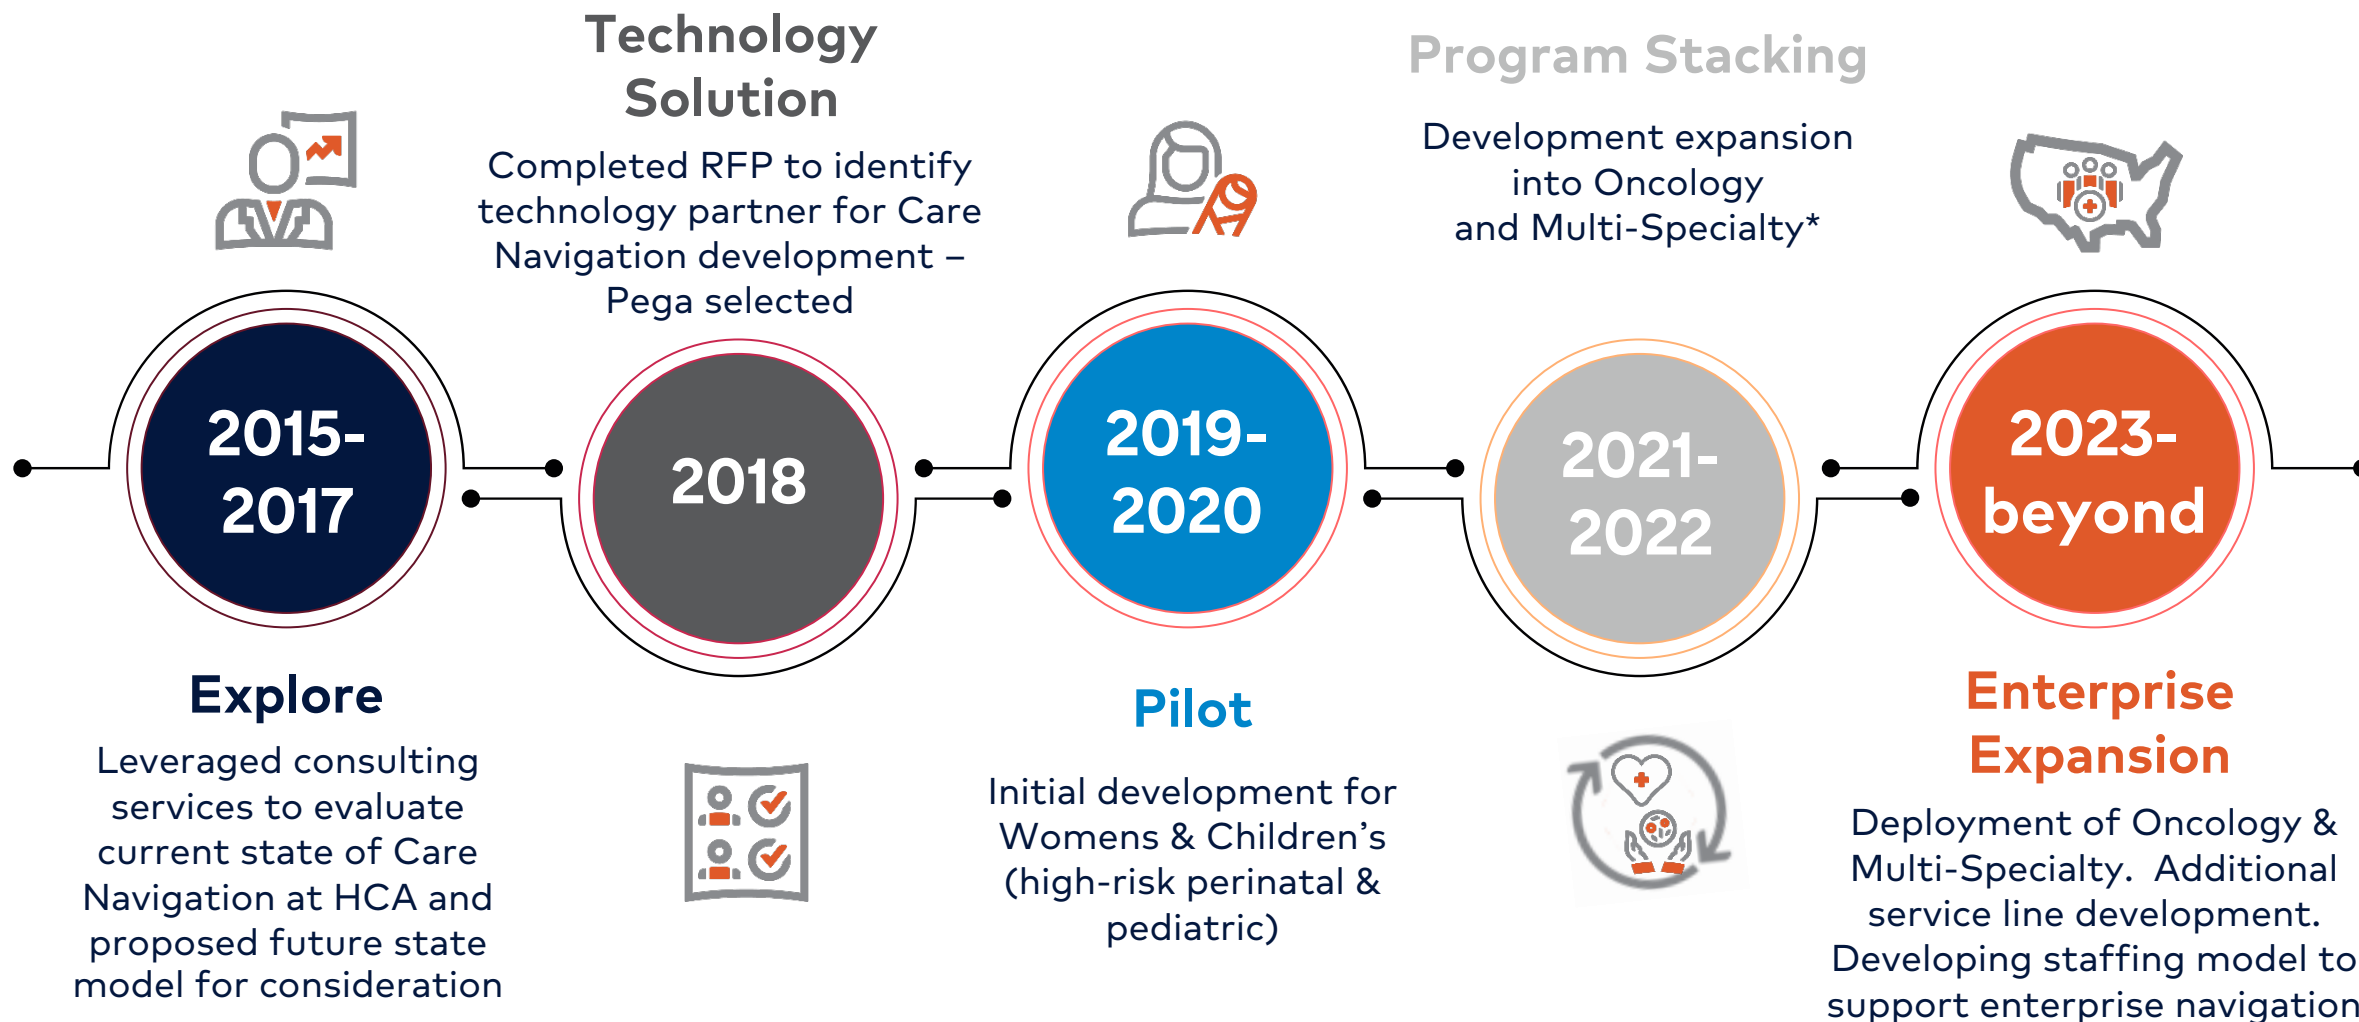

Physician Services Group

Our affiliated businesses:

HCA Care Navigation Journey

HCA Healthcare Navigation Programs

Overarching **Navigation** Objectives

- Assist patients with **access to care** by removing potential barriers
- **Expedite diagnosis and treatment** to improve quality of life
- Connect patients to needed **services within HCA**
- Support **service line growth**

Overarching **Application** Objectives

- **Reach more patients** by improving navigation **efficiency**
 - Workflow standardization
 - IT integrations
 - Digital pathways
- **Accelerate “Idea to Launch”** development
- **Improve communication** between healthcare teams

Care Navigation by the Numbers*

4 Navigation programs	123 Navigators <small>(out of 422)</small>	55 Facilities live <small>(out of 185)</small>	12-35% Increase in navigator productivity <small>(Oncology & Cardiology navigators live since June 2022)</small>	38K+ Patients navigated <small>(since Jan 2019)</small>
14+ New navigation programs or criteria requested to build out in Pega	2700+ Appointments scheduled** <small>(Dec 2021 – Mar 2023)</small>	56% Prior documentation eliminated <small>(Oncology-specific)</small>	16K+ Digital messages sent from Pega <small>(Dec 2021 – Mar 2023)</small>	7 Integrated technology systems

*Stats include navigation programs using the full Care Navigation Application

**Includes appointments scheduled via digital messaging and Pega appointment requests to the Contact Center

Operational Enablement: Delivering on Key Technology Principles

Core Principles

1 Workflow Standardization

Development of workflow templates to drive standardization and accelerate speed to market

2 Reusability

Build core features, functions, integrations to enable configuration and scalability

3 Flexibility

Ability to support nuanced features that are specific to a program or service line's needs (conditions, treatments, etc.)

4 Engagement: Incorporating different models of patient navigation to meet their needs

Digital First Engagement

Unlocks a new channel to engage with patients digitally first and determine next best action for patient's coordination

Episodic

Navigator led engagement to shepherd patient to next step in care journey (e.g., Discharge follow-up)

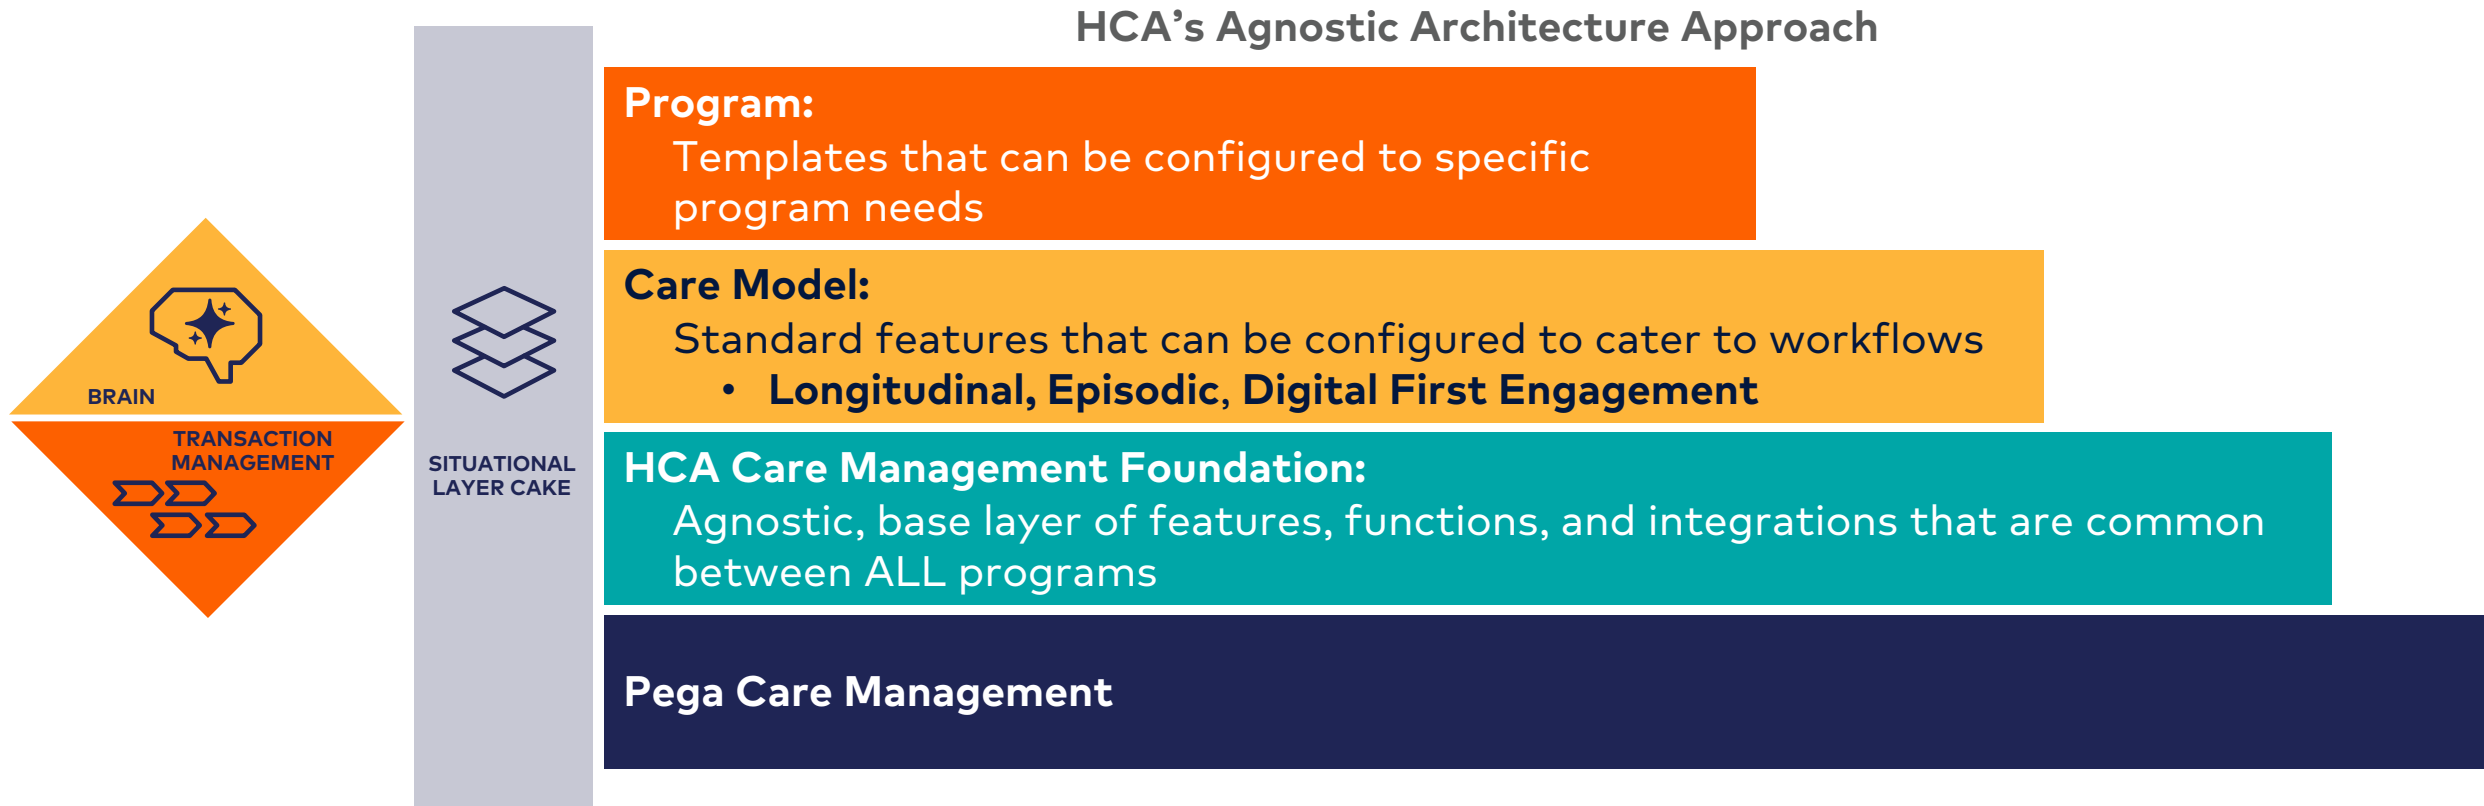

Longitudinal

Navigator led engagement with multiple contacts and coordination across multiple specialties for an extended duration (e.g., Oncology)

Note: Future models will include how patients transfer from one initial engagement/workflow and into another

Architectural Layers

Leveraging **Pega's Layer Cake Model** to accelerate the development of future enterprise programs while remaining flexible to account for the regional or programmatic uses and experiences required for success

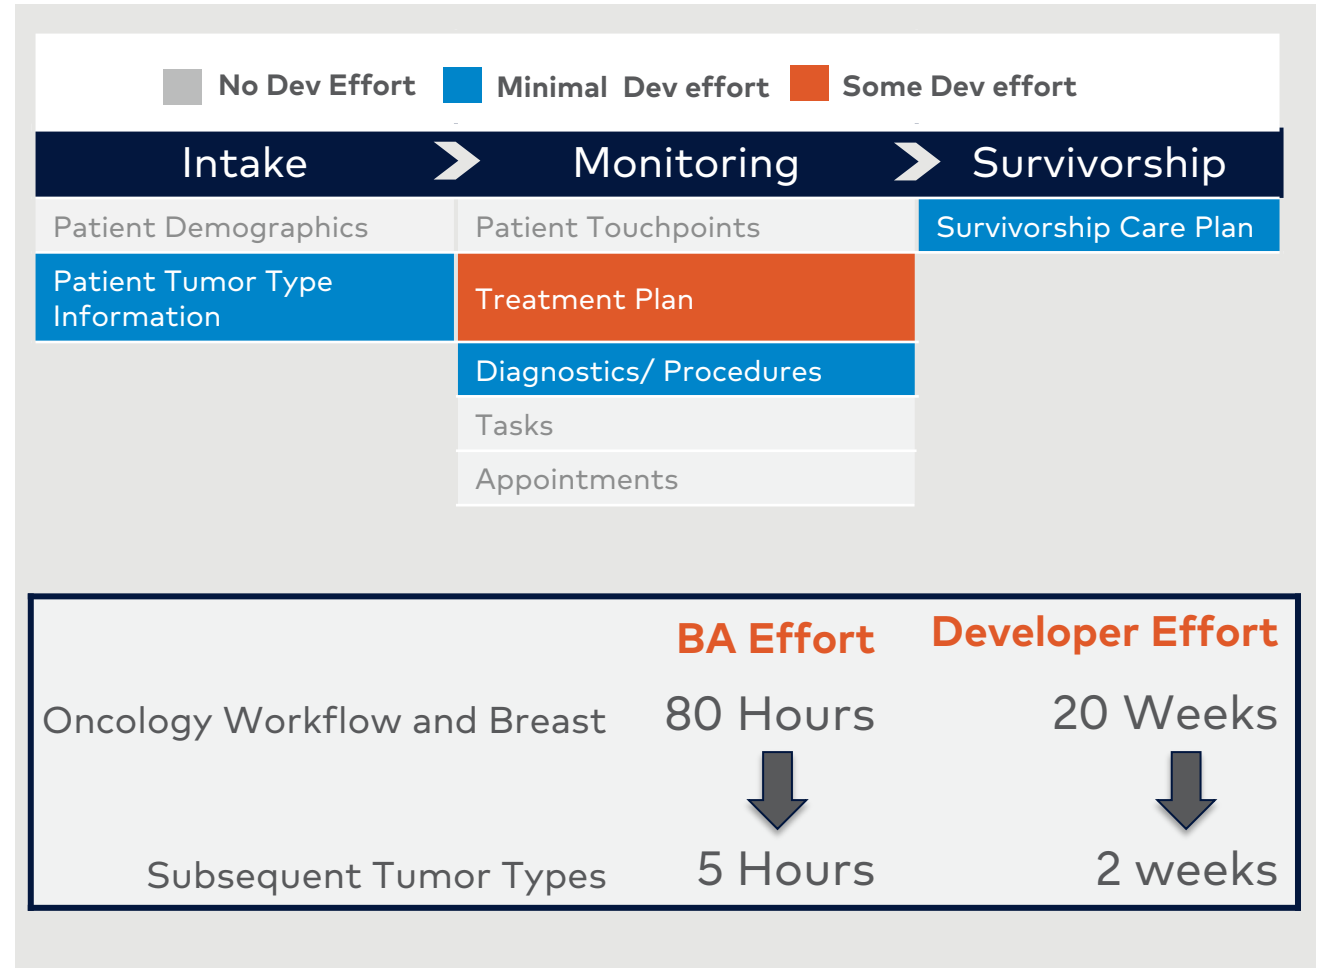

Standardization enables operationalization of virtual and shared services

Oncology Navigation – New Tumor Type Development

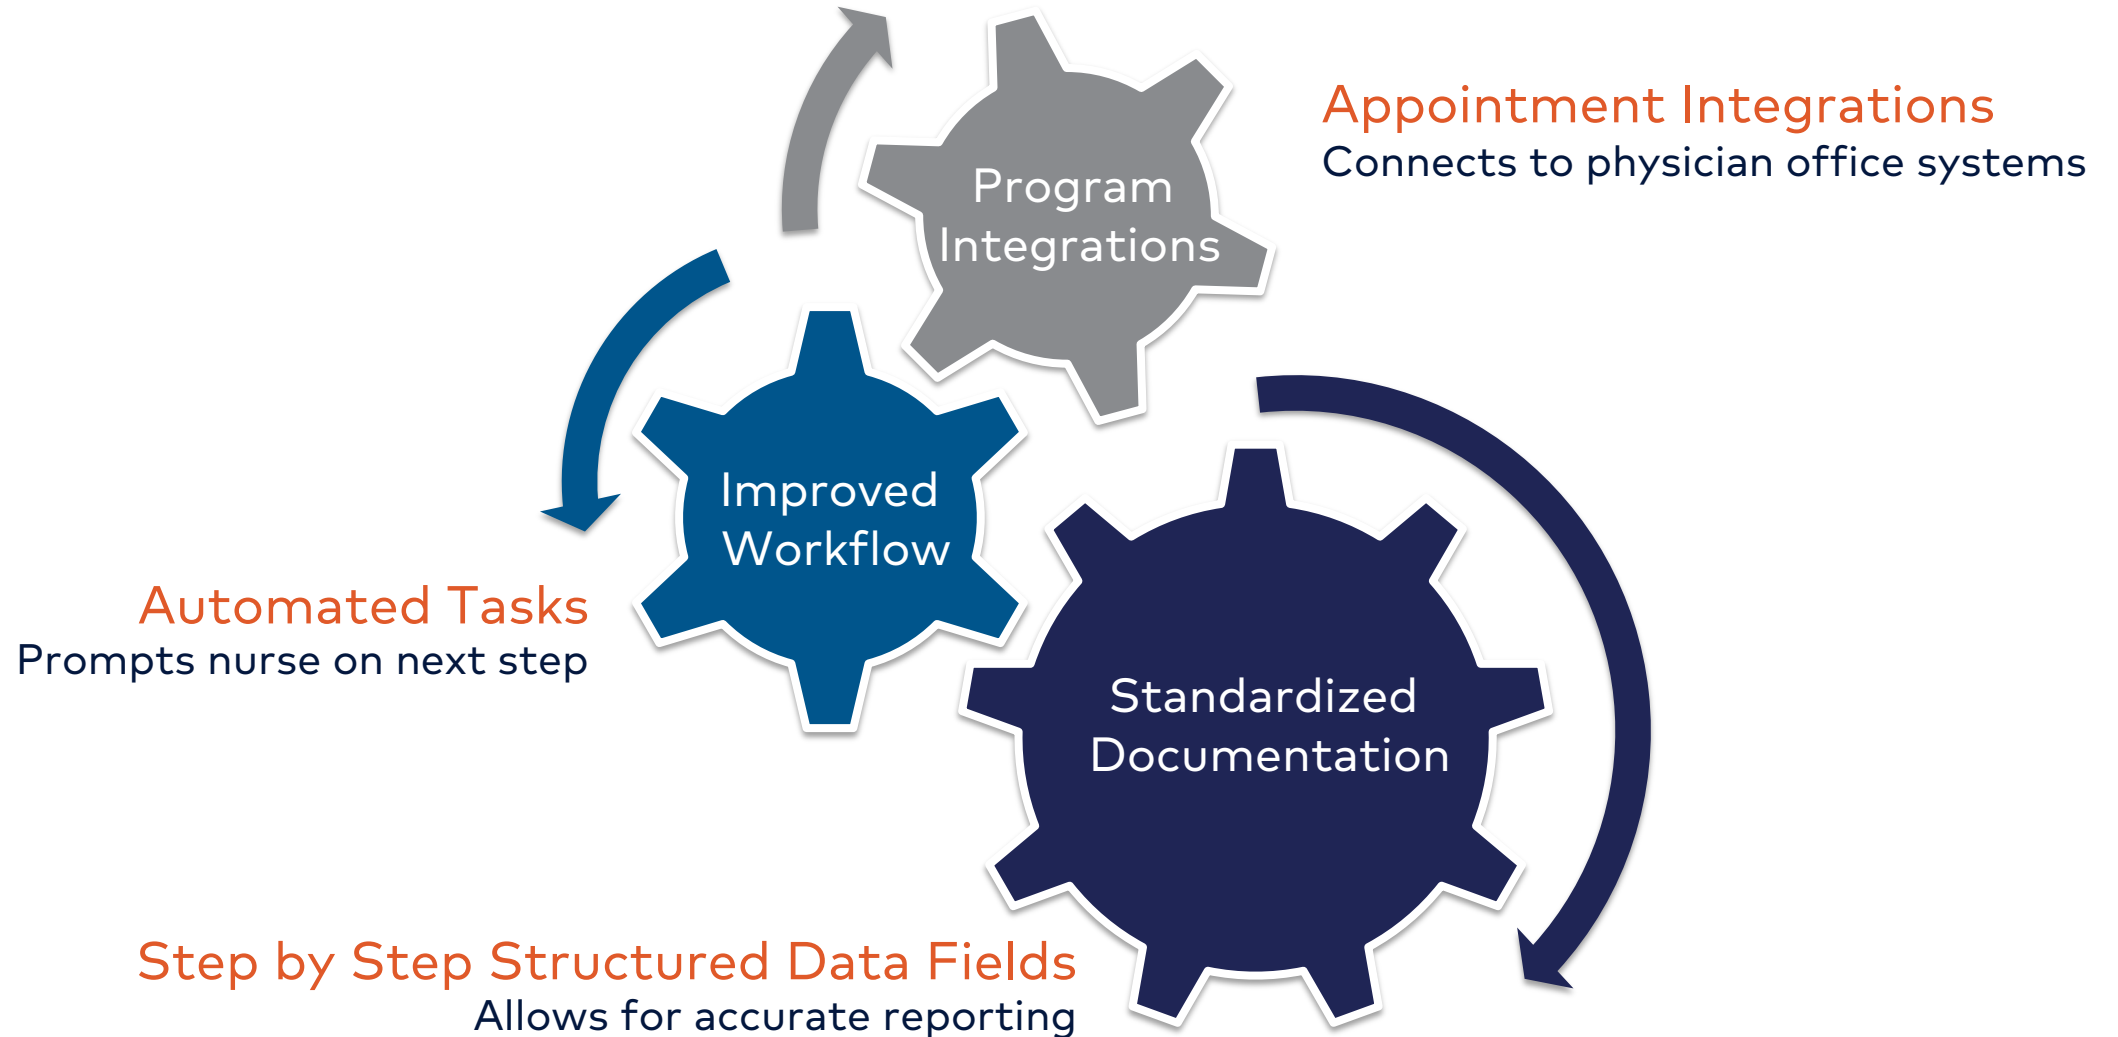

Greatly reduced business analyst (BA) and development resource effort by leveraging reusable features and functions

Oncology Tumor Types:

- Breast
- GYN
- Colon
- Gastro Intestinal
- Genital/ Urinary
- Head and Neck
- Lung
- Neurology
- Sarcoma
- Skin

Leveraging Pega to Drive Efficiency

Efficient Documentation

- Checkboxes allow for **speedy documentation**
- Medical history **tailored to reason for navigation** (i.e., cardiac navigation focuses on cardiac procedures)
- Pre-populates with readmission

Past Medical History

Cardiovascular Past Medical History		Cardiovascular Procedure History	
<input checked="" type="checkbox"/>	Atrial Fibrillation (Afib)	<input type="checkbox"/>	Ablation
<input type="checkbox"/>	Chronic Obstructive Pulmonary Disease (COPD)	<input type="checkbox"/>	Coronary Artery Bypass Graft (CABG)
<input checked="" type="checkbox"/>	Coronary Artery Disease (CAD)	<input checked="" type="checkbox"/>	Implantable Cardioverter-Defibrillator (ICD)
<input type="checkbox"/>	Deep Vein Thrombosis (DVT)	<input type="checkbox"/>	Left Atrial Appendage (LAA) Closure Device
<input type="checkbox"/>	Diabetes Mellitus (DM)	<input type="checkbox"/>	MitraClip or Mitral Valve Surgery
<input checked="" type="checkbox"/>	Heart Failure (HF)	<input type="checkbox"/>	Percutaneous Coronary Intervention (PCI)
<input type="checkbox"/>	Hyperlipidemia (HLD)	<input checked="" type="checkbox"/>	Permanent Pacemaker (PPM)
<input checked="" type="checkbox"/>	Hypertension (HTN)	<input type="checkbox"/>	Transcatheter Aortic Valve Replacement (TAVR) or Aortic Valve Surgery
<input type="checkbox"/>	Renal Disease		
<input type="checkbox"/>	Stroke/Transischemic Attack		

Improved Workflow

- Quick view of daily tasks
- Automated tasks based on clinical pathway

My Day

0 Appointments, 3 Tasks

4/6/2023

Time	Patient Name	Category	Purpose
	[Blurred]	Follow-Up on Barriers	Schedule Transportation
	[Blurred]	Schedule Call - Provider	Clarify Medication Dosage
	[Blurred]	Add. F/U on Barriers/Distress Assessment Needs	Transportation

Standardized Documentation

- Barriers to care documented with **quick sliders**
- Documentation on **application level** updated with each encounter
- Areas of need highlighted with **color cues** and **icons** throughout application

The screenshot displays a user interface for documenting barriers to care, organized into three main sections: Financial/Insurance, Interpersonal, and Communication. Each section features a set of radio buttons for selecting specific barrier categories and a text area for a barrier note.

Financial/Insurance (Icon: Money bag with dollar sign)

- Financial
- Food Insecurity
- Other
- Insurance
- Medication
- Housing
- Work/School

Barrier Note: Pending insurance approval. Discussed medication discount cards and low cost pharmacy.
Remaining: 425 characters
[View Barrier Notes History](#)

Interpersonal (Icon: Group of people)

- Childcare or Adult Care
- Family Issues
- Other
- Lack of Social Support
- Fertility Issues
- Treatment Adherence
- Safety Problems

[View Barrier Notes History](#)

Communication (Icon: Speech bubble)

- Legally Blind
- English as a Second Language
- Hard of Hearing
- Deaf
- Other

Preferred Language: Spanish (dropdown menu)

Interpreter Service Needed: Yes No

Staff Feedback

<u>Daily Activities</u>	Initial Touchpoints	Patient Connections	Patients Closed	Appointment Requests - Patients	Appointment Requests - Appointments	Tasks Completed
	15	22	5	10	13	4

- Daily **individual feedback** on performance/activity
 - Number of successful calls
 - Cases closed
 - Appointments
 - Tasks

Outcomes

Improved Patient Experience

Positive comments related to digital communication

Boosted Operational Excellence

Standardized workflow creating positive navigator experience

Improved Communication Between Healthcare Teams

Visibility of multiple personnel interacting with patients

Accelerated Time to Market

Decreased time for new development based on agnostic layer

Increased Operational Efficiency

Navigator efficiency improved by 12-35%

Enhanced Reporting

Structured fields allow for quick insight into pathways across all programs
